INTRODUCTION

In this guide, you will locate several screws that hold the top panel in place and remove them. They are all Phillips screws and are simple to remove.

TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Top Panel

- Remove four 7.5 mm Phillips screws on the both sides (2 on each side).
- Remove five 7.5 mm Phillips screws on the back of the player.

Step 2

- Lift the top panel from the back and remove. It should come off without being forced. There is a lip near the front so you many need to slide the top panel back slightly to remove it.

To reassemble your device, follow these instructions in reverse order.
